

WEST NILE VIRUS ACTIVITY 2018

MOSQUITO DATA

FROM 5/11/18 - 6/9/18

COLLECTED FROM DAWSON, PHELPS,
AND BUFFALO COUNTIES

Each week, mosquito trappers in our district send mosquitos to the Nebraska Public Health Lab at UNMC in Omaha. Overall, 156 pools in 28 counties are tested for viruses carried by mosquitos. These mosquitos are tested for the West Nile Virus in order to track the spread of the disease.

There are currently no cases of arboviral diseases in the TRPHD area. Buffalo County reported very high number of mosquitos in the area. Due to recent rainfall the number of mosquitos is expected to increase.

Arboviral diseases include: Zika, Dengue, Malaria, and Chikagunya
