

## Risk Dial Feb 17, 2022

### **Risk Dial for COVID-19 Two Rivers Public Health Published Feb 17, 2022**

- 175 cases of COVID-19 were recorded in TRPHD between February 9 - February 15. This is the fourth successive week in a row that cases have dropped, positive cases have declined by 35-55% every week since 19 January, 2022.
- Test positivity rate is under 20% in every county, and as low as 14% in Buffalo county, which accounts for about 65% of the tests conducted in non-long term care facilities in the past week. Positivity rates have fallen across all age groups in the last month.
- TRPHD announced an additional 3 deaths due to COVID this week, taking the total toll for the district to 200.
- As of Feb 15<sup>th</sup>, a little over 51% of the total population of TRPHD has received the minimum prescribed dose of the COVID-19 vaccine. Vaccination rates have shown little appreciable difference in the past month, perhaps predictive of long-term trends. The risk of hospitalization or serious illness following infection is significantly higher for unvaccinated persons.
- As of Tuesday morning, there were 7 ICU beds available in TRPHD (out of 33 overall). Over 40% of ICU beds were occupied by COVID positive patients..
- COVID testing is available at the Buffalo County Fairgrounds (Kearney city) Mondays & Wednesdays 9:30AM - 12:30PM. Those interested are required to register at [www.trphd.org](http://www.trphd.org) for scheduling.
- TRPHD strongly urges all unvaccinated vaccine-eligible residents to avail of the COVID vaccination through their healthcare provider, pharmacy or TRPHD. For schedule of vaccination clinics, see [www.trphd.org](http://www.trphd.org)
- For these reasons, the risk dial is lowered from last week in the 'elevated' (orange) zone. The dial reflects the continued drop in new COVID cases, falling test positivity rates and consistent ICU bed availability.

## Weekly report Feb 9 – Feb 15, 2022

### Overview

The weekly report will look at COVID-19 cases in TRPHD across different time periods, presenting graphs showing daily progress of cases and a weekly summary in conclusion

- The tables describe vaccination, total tests conducted and positive cases across TRPHD from **Feb 9 – Feb 15** (1 week) and **Jan 19 – Feb 15** (4 weeks). We describe new cases by age, gender and county of residence, and present weekly and monthly **test positivity rates**. We describe cases in residential facilities separately from tests in hospitals, & pharmacies<sup>1</sup>. Vaccination rates refer to persons who have received the minimum recommended dose.
- The first graphic describes **the vaccination rate of TRPHD residents by county of residence and age** between **Dec 15, 2020 – Feb 15, 2022**. We present the proportion of persons who have received the minimum recommended dose (2 for Pfizer & Moderna; 1 for Janssen vaccines)
- The second set of graphs look at the progress of the pandemic from **April 1, 2020 – Feb 15, 2022** across all counties.
  - We describe the **7-day rolling average** <sup>2</sup> of positive cases across TRPHD since April, describing overall progress and cases by **age categories**
- The third set of graphs describe the **COVID test positivity rate** in TRPHD from **March 15, 2020 – February 15, 2022**. The graph is modified to show residential, non-residential and overall positivity rates separately. <sup>1,3</sup>
- The fourth set of graphs describe the daily case average (7-day rolling) across towns and cities in three urban areas (**Kearney, Lexington, Holdrege**) (Jul 1, 2020- Feb 15, 2022) <sup>4</sup>
  - The cities described are **Kearney, Elm Creek, Pleasanton, Amherst, Riverdale, Gibbon, Shelton and Axtell** (total 39,412 people), **Lexington, Overton, Elwood, Johnson Lake and Cozad** (total 15,700 people), **Holdrege, Loomis and Funk** (total 5967 people).
- The fifth set of graphs describe daily cases (7-day rolling average) from **Jan 19 – Feb 15, 2022**.
  - Progress is described by age & county of residence.

*To conclude, 175 new COVID cases were detected in the Two Rivers area last week. Test positivity rate outside long term care facilities is under 14% as new cases have dropped for the third straight week. A little over half of TRPHD's population is fully vaccinated and over 23% has received a booster dose. TRPHD has scheduled vaccination clinics across the district, schedule can be found at <https://www.trphd.org/covid-19/event-calendar.html>. TRPHD is operating a public COVID testing site at the Buffalo County Fairgrounds 9:30 AM – 12:30 PM, Mondays and Wednesdays. Those eligible for vaccines or booster doses are advised to contact TRPHD or their physician or local pharmacy. To access services through Two Rivers health department, residents are required to visit [www.trphd.org](http://www.trphd.org) to register an appointment (for COVID testing). TRPHD vaccination clinics accept walk-in customers and will provide appropriate vaccine dose as indicated.*

---

<sup>1</sup> For information on residential facilities, please see appendix 3

<sup>2</sup> 7-day rolling average refers to the sum of the cases reported on that day and the preceding 6 days divided by 7.

This number is presented for each day to 'smooth out' the line for cases.

<sup>3</sup> For information on "average positivity rate", please see appendix 2

<sup>4</sup> For information on urban areas, please see appendix 5

### Testing & Vaccination Overview

- As of Feb 15, 2022, over 66% of the total population of Two Rivers Health District has been tested at least once for COVID-19. More than 233,000 COVID tests have been conducted since March 1, 2020 and almost 21,000 persons have tested positive at least once – at least 1600 have tested COVID positive more than once.<sup>5</sup> TRPHD has publicly notified 200 deaths due to COVID-19 across the district.
- As of Feb 15, 2022, 51% of TRPHD’s entire population has been fully vaccinated. <sup>6</sup> Details of vaccination rates by age in each of the seven counties in Two Rivers Health District is shown below. The legend for color codes used is also displayed. Percentages have been rounded off to the nearest whole number. Vaccines are currently available to all eligible residents aged 5 years and over.

	BUFFALO	DAWSON	FRANKLIN	GOSPER	HARLAN	KEARNEY	PHELPS	TRPHD
0-17 YRS	18%	19%	11%	13%	10%	19%	11%	17%
18-29 YRS	38%	55%	30%	41%	31%	45%	34%	41%
30-39 YRS	52%	60%	44%	36%	44%	44%	48%	53%
40-49 YRS	65%	62%	48%	52%	34%	69%	45%	61%
50-59 YRS	68%	65%	47%	49%	48%	55%	56%	63%
60-69 YRS	82%	82%	66%	71%	63%	77%	68%	78%
70-79 YRS	100%	89%	91%	61%	85%	84%	96%	94%
80+ YRS	95%	77%	76%	76%	57%	70%	79%	83%
ALL AGES	52%	54%	48%	48%	42%	51%	47%	51%

0% - 33%	Less than 1/3rd received 1 or 2 dose as recommended
34% - 49%	1/3rd to 1/2 received 1 or 2 dose as recommended
50%- 74%	1/2 to 3/4ths received 1 or 2 dose as recommended
75% & higher	Over 3/4ths received 1 or 2 dose as recommended

- How to read this table: (For eg.) : “60% of all Dawson county residents aged 30-39 years have received the minimum recommended vaccine dose (2 for Moderna & Pfizer; 1 for Janssen) However only 36% of all residents in their 30s in Gosper county have received minimum recommended dose.”

<sup>5</sup> Note: Data collection limitations (recording of different first names, alternate spellings, unrecorded or delayed antigen test results) hamper an exact count of measures like total persons tested, or number of distinct positive cases.

<sup>6</sup> For information on vaccine-eligible population in each of the counties, please see appendix 4

- The table below provides details of positive cases detected in 7 counties in TRPHD in the past week (**Feb 9 - Feb 15**) and past 4 weeks (**Jan 19- Feb 15**).
- Results are described by the site where tests were conducted, and include both antigen and PCR tests.

	Feb 9 - Feb 15 (1 week)			Jan 19 - Feb 15 (4 weeks)		
	Total Tests	Positive Results	Positivity Rate	Total Tests	Positive Results	Positivity Rate
Hospital/ Clinic	543	79	14.5%	3489	1,223	35.1%
State Laboratory	72	4	5.6%	743	205	27.6%
Residential Facility	4558	42	0.9%	10705	216	2.0%
Lab/ Pharmacy	45	13	28.9%	507	237	46.7%
Other	308	37	12.0%	1631	523	32.1%
<b>TOTAL</b>	<b>5,526</b>	<b>175</b>	<b>3.2%</b>	<b>17,075</b>	<b>2,404</b>	<b>14.1%</b>

- A total of 10,705 tests were availed by residents and staff of long-term care and other **residential facilities** <sup>7</sup> in the last 4 weeks, and were almost all antigen tests. Details are provided below:

Residential Facility In:	Feb 9 - Feb 15 (1 week)			Jan 19 - Feb 15 (4 weeks)		
	Total Tests	Positive Results	Positivity Rate	Total Tests	Positive Results	Positivity Rate
Buffalo	3799	32	0.8%	5138	82	1.6%
Dawson	297	1	0.3%	1489	60	4.0%
Franklin	0	0	0.0%	0	0	0.0%
Gosper	49	1	2.0%	357	7	2.0%
Harlan	30	0	0.0%	495	5	1.0%
Kearney	76	2	2.6%	900	15	1.7%

<b>Total</b>	<b>968</b>	<b>133</b>	<b>13.7%</b>	<b>6,370</b>	<b>2,188</b>	<b>34.3%</b>

<sup>8</sup> For information on residential facilities, please see appendix 3  
 516 W 11<sup>th</sup> Street, Suite 108  
 Kearney, NE 68845

- The graph below describes **all TRPHD residents who are fully vaccinated** against COVID-19 between **December 15, 2020 - February 8, 2022**. All residents of the seven counties are included although the vaccine is currently available only to those 5 years or over.
- Each county is depicted by a colored circle, and the relative position of each corresponds to the proportion vaccinated. Actual numbers (count) are included in parenthesis.
- **Overall, 51% of TRPHD's total population and 62% of all adult residents (18 years and over) have received the minimum prescribed dose of vaccine (2 for Pfizer, Moderna, 1 for Janssen).**

## Vaccinations of Total Population in TRPHD

- The graph below describes 7-day rolling average of COVID-19 across TRPHD from **April 1, 2020 – Feb 15, 2022**.
- The second graph describes 7-day rolling average of COVID-19 cases by age across TRPHD for the same time period. The height of the graph corresponds to total cases and the thickness of each colored band corresponds to each age group.

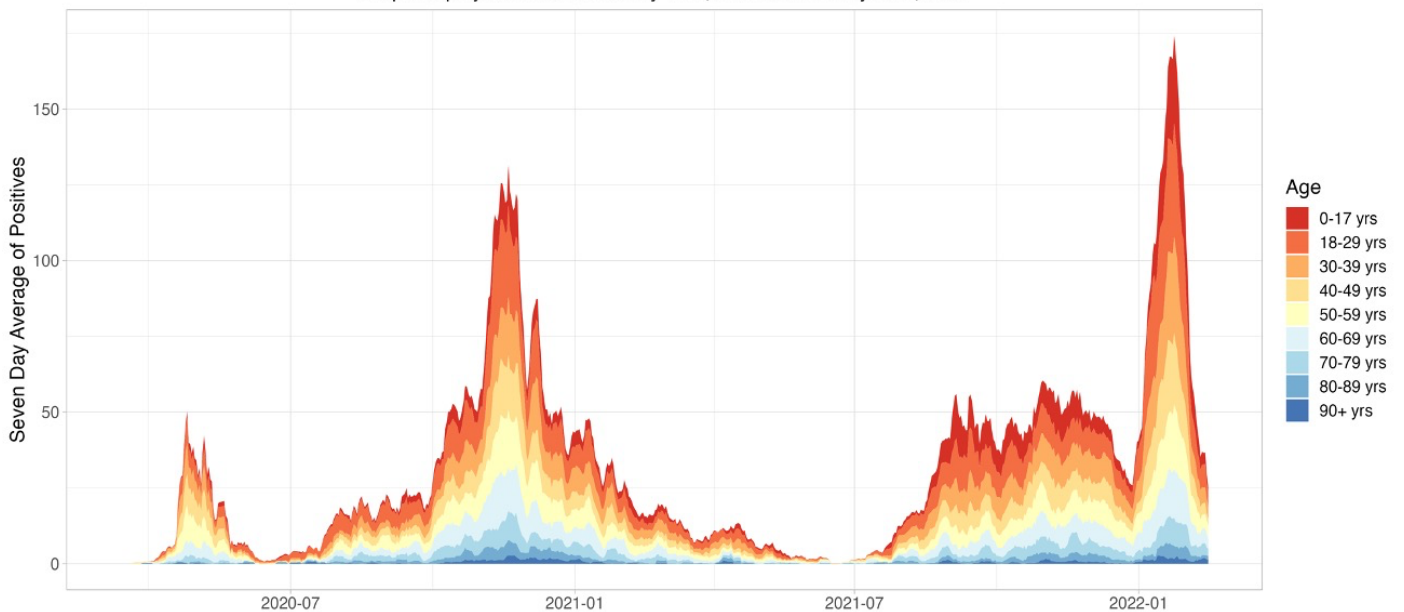

### 7 Day Rolling Average of Two Rivers

Graph displays data from April 1st, 2020 to February 15th, 2022

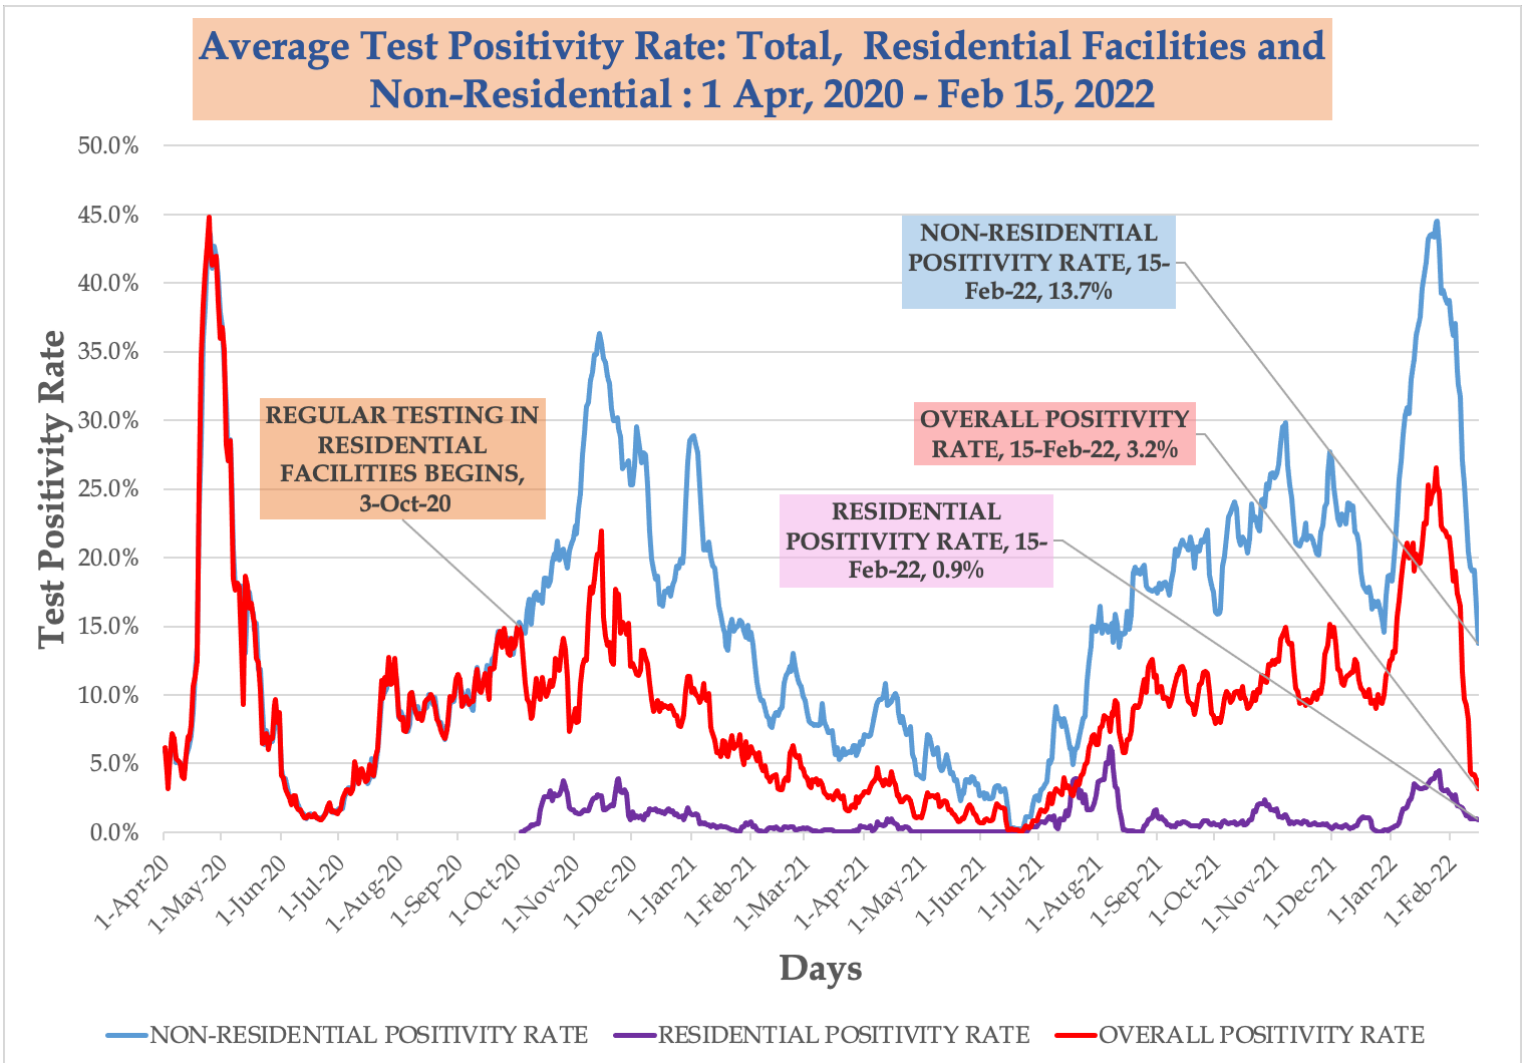

### Daily Average of COVID-19 Cases in TRPHD by Age

Graph displays data from January 18th, 2022 to February 15th, 2022

- The graphs below describe the average **test positivity rate (7-day rolling average)**<sup>9</sup> in TRPHD from **April 1, 2020 - February 15, 2022**. The graph depicts the entire county including Buffalo, Dawson, Phelps, Franklin, Gosper, Harlan and Kearney counties.
- Graph describes all tests (overall positivity rate), those conducted **in residential facilities**, and those conducted outside residential facilities in the last 20 months <sup>10</sup>
- Graph may be read thus (for eg): “In the week Feb 9 - Feb 15, **3.2% of all COVID tests** conducted in TRPHD was positive; **13.7% of all tests** excluding long term care and other residential facilities was positive.”

<sup>9</sup> For description of average positivity rate, see appendix 1

<sup>10</sup> For information on residential facilities, please see appendix 3

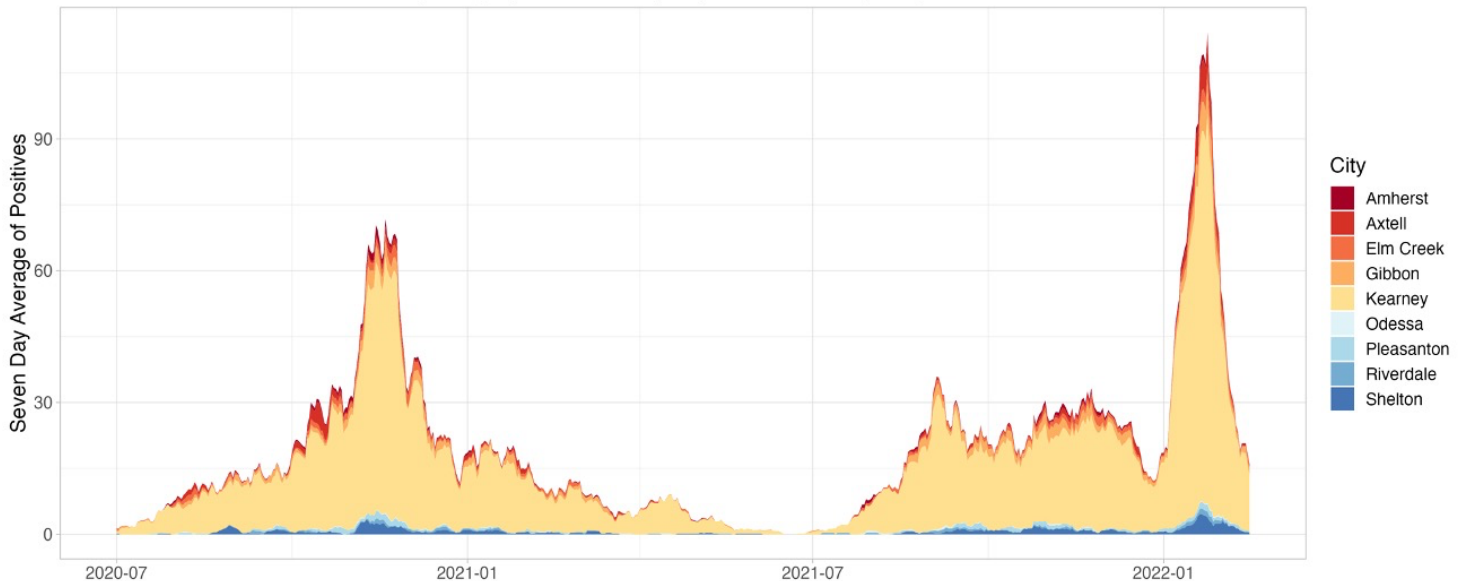

- The following graphs describe the average **daily COVID cases (7-day rolling)** in three urban areas in Two Rivers Health Department.
- The urban areas are Kearney city and surrounding towns (**Kearney, Elm Creek, Pleasanton, Amherst, Riverdale, Gibbon, Shelton and Axtell - total 39,412 people**), Lexington city and surrounding towns (**Lexington, Overton, Elwood, Johnson Lake and Cozad - total 15,700 people**), Holdrege city and surrounding towns (**Holdrege, Loomis and Funk - total 5967 people**).<sup>11</sup>
- Time considered is from **July 1, 2020 - Feb 15, 2022**. Scales are different for all three graphs
- The graph for Kearney city and surrounding areas is presented below.

### 7 Day Rolling Average of COVID-19 Cases by City

Graph displays data from July 1st, 2020 to February 15th, 2022

Information Updated as of 2/15 at 8 p.m.

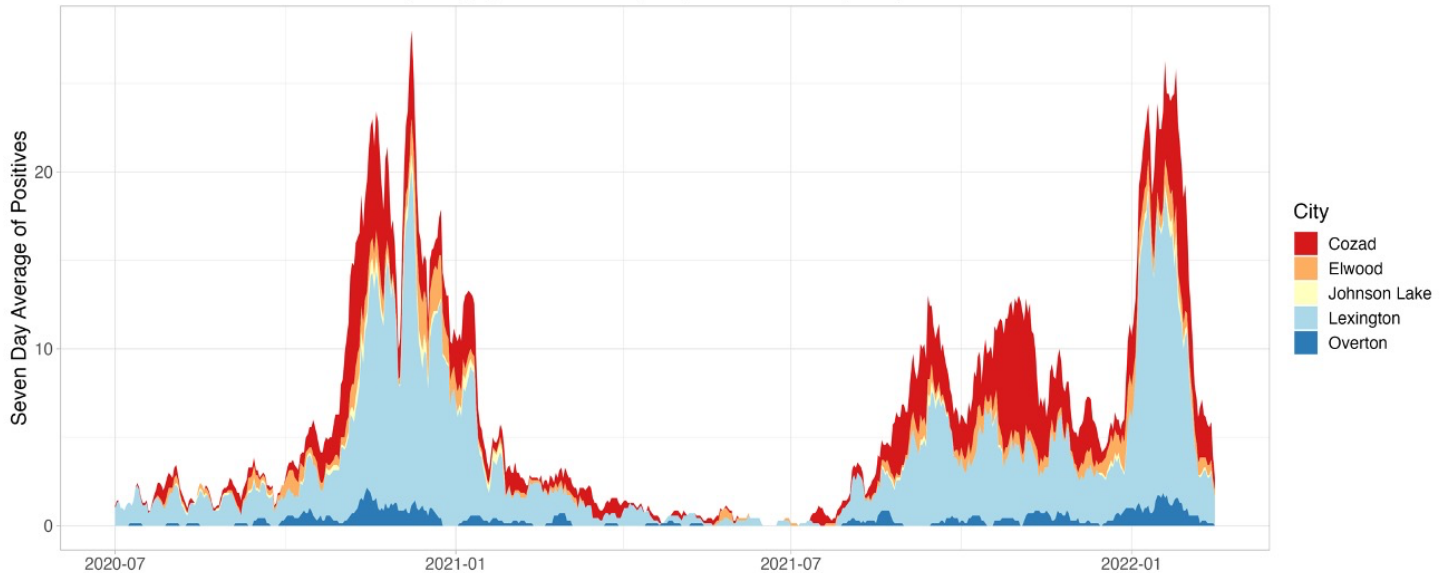

<sup>11</sup> For details about each of the urban areas, please see appendix 5  
516 W 11<sup>th</sup> Street, Suite 108  
Kearney, NE 68845

- The **daily average (7-day rolling)** of positive cases in **Lexington** and **Holdrege** cities and surrounding towns between July 1, 2020 – Feb 15, 2022 are presented below.

### 7 Day Rolling Average of COVID-19 Cases by City

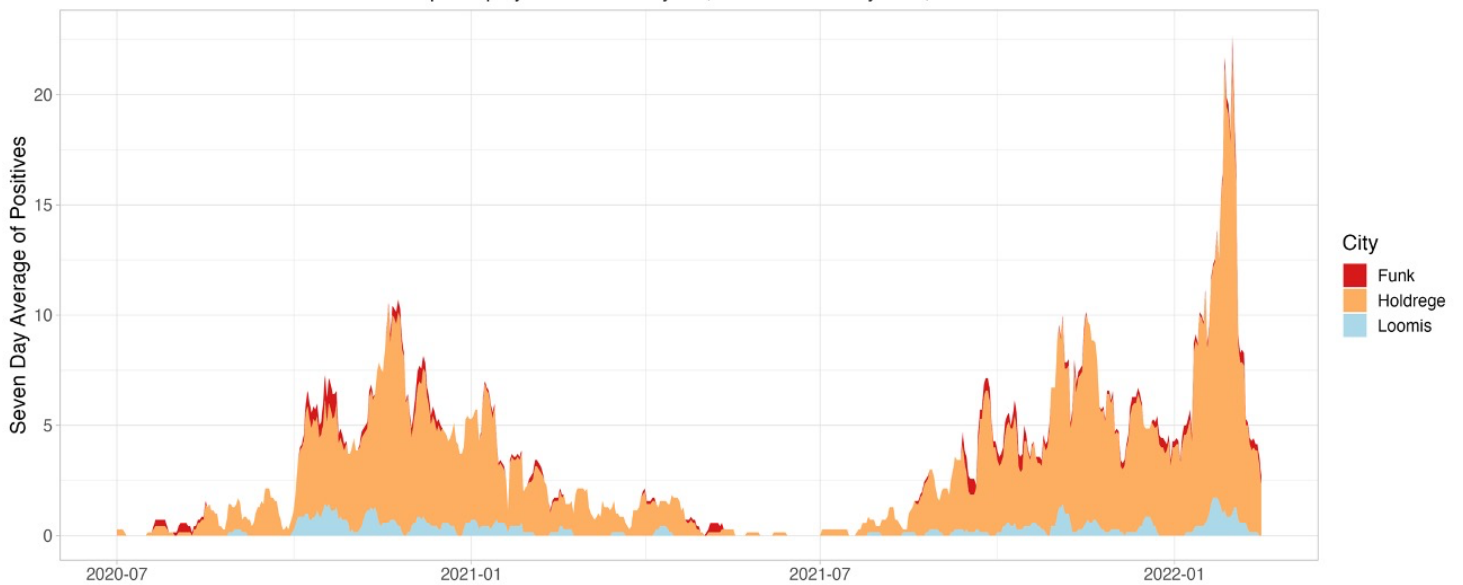

Graph displays data from July 1st, 2020 to February 15th, 2022

Information Updated as of 2/15 at 8 p.m.

### 7 Day Rolling Average of COVID-19 Cases by City

Graph displays data from July 1st, 2020 to February 15th, 2022

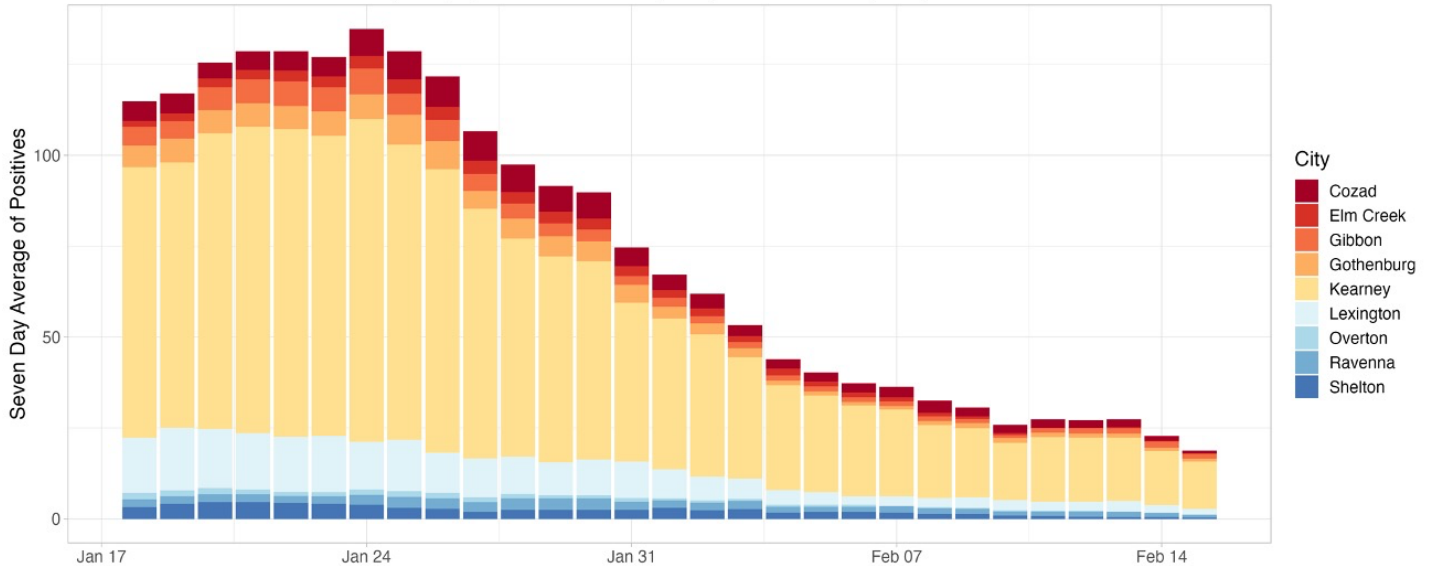

Information Updated as of 2/15 at 8 p.m.

- The following bar graphs describes the 7-day rolling averages by city for the past four weeks (**Jan 19 - Feb 15**) in TRPHD. The graph above shows cities in **Buffalo and Dawson** counties and the one below shows the graph for cities in **Gosper, Harlan, Kearney and Phelps** counties. The scale is different for both graphs.

### 7 Day Rolling Average of COVID-19 Cases Buffalo and Dawson County

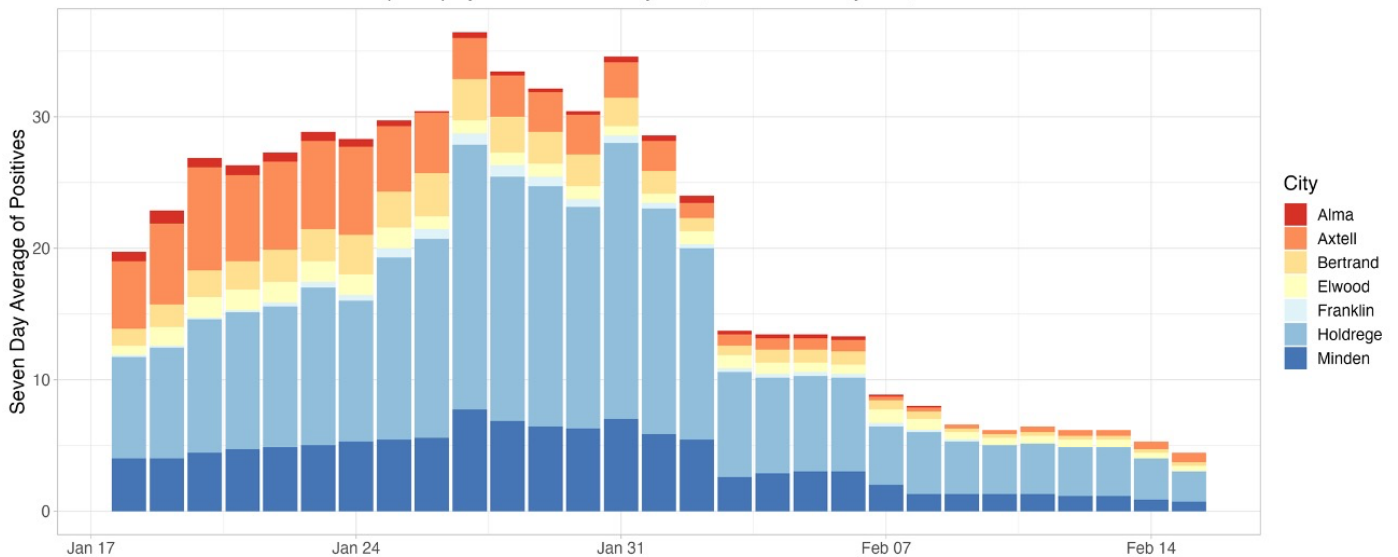

Graph displays data from January 18th, 2022 to February 15th, 2022

Information Updated as of 2/15 at 8 p.m.

### 7 Day Rolling Average of COVID-19 Cases Gosper, Franklin, Kearney, and Phelps County

Graph displays data from January 18th, 2022 to February 15th, 2022

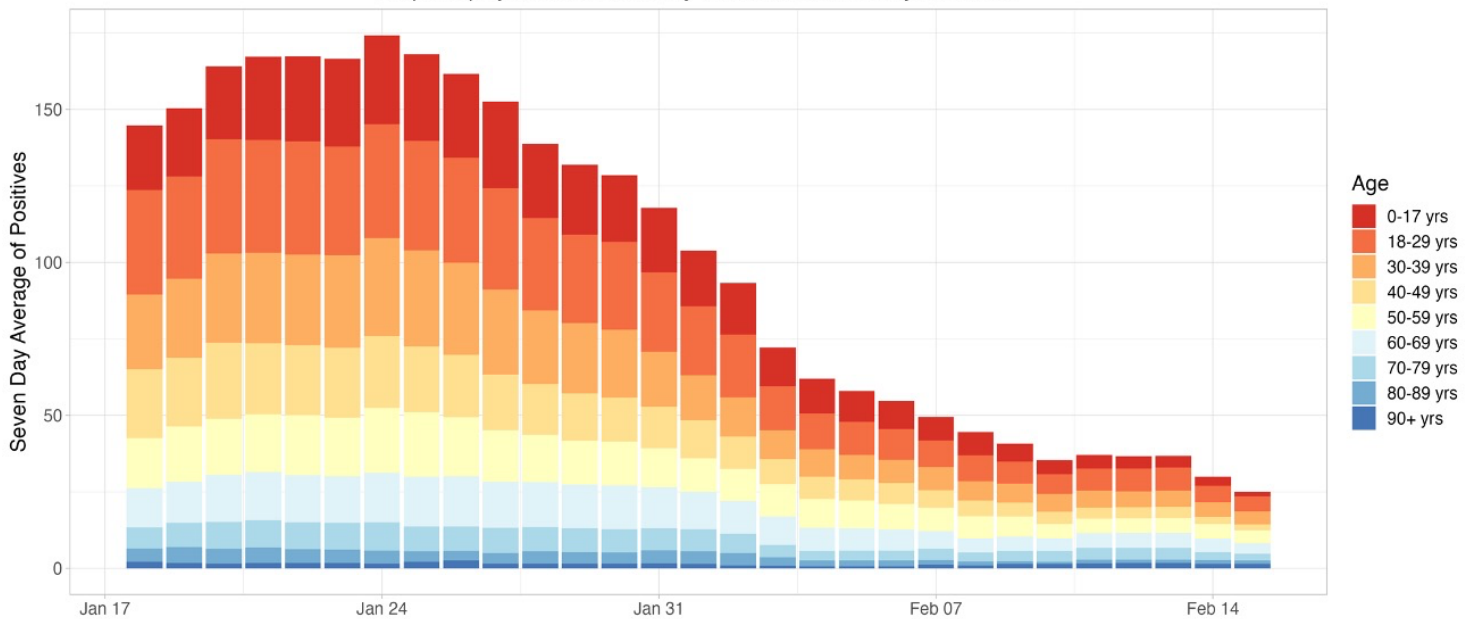

Information Updated as of 2/15 at 8 p.m.

- The graph below describes the **7-day rolling average** of cases from **Jan 19 – Feb 15** by age. The height of the graph corresponds to total cases and the thickness of each colored band corresponds to each age group.

### 7 Day Rolling Average of COVID-19 Cases in Two Rivers by Age

Graph displays data from January 18th, 2022 to February 15th, 2022

Information Updated as of 2/15 at 8 p.m.

### Weekly summary

- 175 cases of COVID-19 were recorded in TRPHD between February 9 - February 15. This is the fourth successive week in a row that cases have dropped, positive cases have declined by 35-55% every week since 19 January, 2022.
- Test positivity rate is under 20% in every county, and as low as 14% in Buffalo county, which accounts for about 65% of the tests conducted in non-long term care facilities in the past week. Positivity rates have fallen across all age groups in the last month.
- TRPHD announced an additional 3 deaths due to COVID this week, taking the total toll for the district to 200.
- As of Feb 15<sup>th</sup>, a little over 51% of the total population of TRPHD has received the minimum prescribed dose of the COVID-19 vaccine. Vaccination rates have shown little appreciable difference in the past month, perhaps predictive of long-term trends. The risk of hospitalization or serious illness following infection is significantly higher for unvaccinated persons.
- As of Tuesday morning, there were 7 ICU beds available in TRPHD (out of 33 overall). Over 40% of ICU beds were occupied by COVID positive patients..
- COVID testing is available at the Buffalo County Fairgrounds (Kearney city) Mondays & Wednesdays 9:30AM - 12:30PM. Those interested are required to register at [www.trphd.org](http://www.trphd.org) for scheduling.
- TRPHD strongly urges all unvaccinated vaccine-eligible residents to avail of the COVID vaccination through their healthcare provider, pharmacy or TRPHD. For schedule of vaccination clinics, see [www.trphd.org](http://www.trphd.org)
- For these reasons, the risk dial is lowered from last week in the 'elevated' (orange) zone. The dial reflects the continued drop in new COVID cases, falling test positivity rates and consistent ICU bed availability.

*To conclude, 175 new COVID cases were detected in the Two Rivers area last week. Test positivity rate outside long term care facilities is under 14% as new cases have dropped for the third straight week. A little over half of TRPHD's population is fully vaccinated and over 23% has received a booster dose. TRPHD has scheduled vaccination clinics across the district, schedule can be found at <https://www.trphd.org/covid-19/event-calendar.html>. TRPHD is operating a public COVID testing site at the Buffalo County Fairgrounds 9:30 AM – 12:30 PM, Mondays and Wednesdays. Those eligible for vaccines or booster doses are advised to contact TRPHD or their physician or local pharmacy. To access services through Two Rivers health department, residents are required to visit [www.trphd.org](http://www.trphd.org) to register an appointment (for COVID testing). TRPHD vaccination clinics accept walk-in customers and will provide appropriate vaccine dose as indicated.*

## APPENDIX 1

### Background

The Two Rivers Public Health Department (TRPHD) covers 7 counties in central Nebraska, reaching 97,132 people who live and work in the health district spread across roughly 4663 square miles. Over three quarters of residents live in Buffalo and Dawson county, a tenth live in Phelps county, and the remaining 15% is spread somewhat comparably among the four counties of Kearney, Harlan, Franklin and Gosper in decreasing order of population. The largest cities are Holdrege (pop. 5408), Lexington (pop. 10115) and Kearney (pop. 33867) meaning that well over half the residents of TRPHD live in three cities, and over a third are in Kearney alone. The population of all 7 counties in TRPHD are shown below.

County	Population
Buffalo	49,659
Dawson	23,595
Franklin	2,979
Gosper	1,990
Harlan	3,380
Kearney	6,495
Phelps	9,034
<b>TRPHD total</b>	<b>97,132</b>
Nebraska state	1,934,408
United States	328,239,523

- Data is presented as 7-day rolling averages for daily numbers and absolute counts for cumulative cases. The 7-day rolling average is the sum of all cases reported on that day plus the previous six divided by 7.
- Total (cumulative) cases refer to all COVID cases that have been confirmed by testing in the district since the beginning of the pandemic in TRPHD (March 19)
- All tests refers to all types of tests conducted across the Health District, including laboratory-based PCR and rapid antigen.
- Average positivity rate refers to a seven-day rolling average positivity rate, which is the sum of all cases for that day and the previous six divided by the sum of all tests done in that day and the previous six. This is also the same as the “weekly positivity rate”
- In cases that call for comparison across larger areas (counties v/s state of Nebraska, for eg), we present the count per 100,000 population. 100,000 roughly corresponds to the population of Two Rivers Health District (97,132)
- In cases that call for comparison between cities, (Kearney v/s Minden for eg), we present a count per 10,000 population. 10,000 roughly corresponds to the population of Lexington (10,115), the second largest city in TRPHD.
- Deaths due to COVID-19 are identified in death certificates (usually COVID -19 is the Underlying Cause of Death) and attested by the attending physician or medical examiner/ coroner. Each case is further investigated by TRPHD over telephone - the next

of kin is contacted, condolences conveyed and exit interviews conducted by Department staff before releasing a public notification. For further details on the procedure for COVID-19 death certification, please see <https://www.cdc.gov/nchs/data/nvss/vsrg/vsrg03-508.pdf>

- For calculation, we use the 2019 mid- year census estimate (American Community Survey, ACS) and data from The Atlantic’s COVID tracking project (<https://covidtracking.com/data>)

## APPENDIX 2

### Total (cumulative) cases per 100,000 population

The total/ cumulative case counts are the **total** cases confirmed by testing in an area (county, city, state or health district) calculated from the first recorded case (in case of TRPHD this is March 19, 2020). This is expressed as a fraction of the total population of the area and standardized to 100,000 persons. A population of 100,000 is used to compare counties as it is comparable to the overall population of Two Rivers Health District (97,032).

Total (cumulative) cases / 100,000 persons is calculated as:

**[(Total positive test results for residents in the region)] / (mid-year population) \* 100,000**

### Daily average of cases per 100,000 population

**The daily average (7-day rolling) of cases** is the sum of all cases reported on that day plus the previous six divided by 7. This is expressed as a fraction of the total population of the area and standardized to 100,000 persons. A population of 100,000 is used to compare counties as it is comparable to the overall population of Two Rivers Health District (97,032).

Daily average of cases / 100,000 persons is calculated as:

**[(7-day rolling average of cases among residents)] / (mid-year population) \* 100,000**

## APPENDIX 3

About a third of all tests conducted since March in the district have been availed by residents or staff of residential facilities. “Residential facilities” include long-term care facilities, in-patient psychiatry services, retirement villages, veterans’ homes and correctional facilities within Two Rivers Health District.

Considering the specific nature of COVID risk of long-term residents of institutional facilities and taking into account the frequent testing performed at facilities, we present numbers separately for long term care facilities and others in the district.

## APPENDIX 4

### Vaccines used in TRPHD

In the first phase, COVID-19 vaccines have been approved for use in all persons over the age of 16 years. Currently, Pfizer and Moderna vaccine formulations are being offered in Two Rivers Health District. Use of the Johnson & Johnson (Janssen) vaccine formulation has been paused pending further scrutiny by the Food and Drug Administration (FDA).

The Nebraska Department of Health and Human Services paused use of the Johnson & Johnson (Janssen) COVID-19 vaccine after Centers for Disease Control and Prevention (CDC) and Food and Drug Administration (FDA) recommendations following reports of six women who have been hospitalized with severe blood clots after receiving the vaccine dose, including one woman in Douglas county. The women were aged between 18-48 years. Vaccine use was reinstated on April 26, 2021 and is now available at private pharmacies across the state.

To date, over 6.8 million doses of Janssen vaccine have been administered in the United States, over 31,500 in Nebraska, and 1560 in Two Rivers Health District.

Symptoms in the 6 hospitalized individuals included headache, back pain, other unexplained pain. Symptoms typically began 6-13 days after vaccination, and hospital admission was within 15 days, on average. More than 55% of the Janssen vaccine was administered before 22nd of March in Two Rivers Health District.

## APPENDIX 5

### Methods & Definitions

To better understand the course of the COVID-19 pandemic in Kearney, Lexington and Holdrege, we created ‘urban areas’ that included both the city and its surrounding towns. We included all towns within 20 miles of Kearney city, 15 miles of Lexington and 10 miles of Holdrege within each city’s urban area. The respective populations of all 7 counties in TRPHD are shown below. Kearney city accounts for over third of the population of TRPHD.

County	Population
Buffalo	49209
Dawson	23733
Franklin	2987
Gosper	2013
Harlan	3415
Kearney	6529
Phelps	9100
<b>TRPHD total</b>	<b>96986</b>
Nebraska state	1,934,408

Thus “Kearney area” includes Kearney city as well as Elm Creek, Pleasanton, Amherst, Riverdale, Odessa, Gibbon, Shelton and Axtell.

“Lexington area” includes Lexington city as well as Overton, Johnson Lake and Cozad.

“Holdrege area” includes Holdrege city, Loomis and Funk.

The populations of cities and villages is described below. Also included are Minden and Gothenburg, used as comparison points in descriptive statistics about the area.

CITY	POPULATION
Kearney	33867
Elm Creek	949
Axtell	751
Pleasanton	359
Riverdale	179

For presenting data, we selected 3 time frames:

- a) April 1 - current (From the beginning of the pandemic to most recent Tuesday)
- b) July 01 - current (From the beginning of second sustained 'wave' in daily case counts to current)
- c) Previous 4 weeks
  - Data is presented as 7-day rolling averages for daily numbers and absolute counts for cumulative cases. The 7-day rolling average is the sum of all cases reported on that day plus the previous six divided by 7.
  - Cumulative cases refer to all cases that have been confirmed in the district since the beginning of the pandemic in TRPHD (March 19)
  - Average positivity rate refers to a seven-day rolling average positivity rate, which is the sum of all cases for that day and the previous six divided by the sum of all tests done in that day and the previous six
    - Average positivity rate (in %) = (Sum of positive cases for current day + previous 6 days) / (Sum of total tests for current day + previous six days)
  - In cases that call for comparison across larger areas (counties v/s state of Nebraska, for eg), we present the count per 100,000 population. 100,000 roughly corresponds to the population of Two Rivers Health District (97,132)
  - In cases that call for comparison between cities, (Kearney v/s Minden for eg), we present a count per 10,000 population. 10,000 roughly corresponds to the population of Lexington (10,115), the second largest city in TRPHD.
  - For calculation, we use the 2019 mid- year estimate (American Community Survey, ACS) and data from The Atlantic's COVID tracking project (<https://covidtracking.com/data>)
